

ASTM D3811 Tape Roll Peel Fixture

Tensile Rating: 10kN or 2,250 lbs.

Standard Size: 3" inner diameter roll, up to 2" wide tape, up to 2" tape thickness

Adapter Coupling: 5/8" with a 5/16" Locking Pin

The ASTM D3811 peel fixture is used to test the unwinding peel force of an entire roll of tape. The roll is mounted onto the spinning drum and the end of the tape is pulled with a top grip such as a vise grip or similar.
